

DESIREE DOLRON

PARIS PHOTO LOS ANGELES

PARAMOUNT PICTURES STUDIOS MAY 01 – 03, 2015

GRIMM is proud to announce a solo presentation by Desiree Dolron at Paris Photo Los Angeles.

Desiree Dolron (1967, Haarlem, The Netherlands) will present four recent and new works from her *Xteriors series*. This particular body of work is based on a recurring dream about an early childhood experience and is based on a continuous study of time; of being and not being. *The Xteriors series* (2001-2015) is influenced by the subject of representation and image making in a historical context. Within these works it is not the narrative that is most important, but rather the mysteriousness and the subtle disorienting effect of the image that imprints itself in the viewers mind.

Her meticulous dedication to detail in both composition and light is what sets her works apart within the field of contemporary

photography. Often compared with paintings, Dolron is working at the pinnacle of technical possibilities within her medium: color composition and especially light, similar to the painting process of classical portraiture she greatly admires, applied layer by layer, pixel by pixel, during the digital finishing of these works. The slow and laborious process is fundamental to the realization of her work. This offers her the time and opportunity to create images that are both painterly and photographic.

A monograph of Dolron's *Xteriors series* is currently in preparation –designed by the esteemed graphic designer Irma Boom– with contributions by Rijksmuseum director Wim Pijbes and Stephan Kemperdick, curator of the Gemäldegalerie in Berlin.
